Module 8 | Lesson 8.3 – Autogenerated types with Apollo CLI

1. What benefit is there to automatically generating TypeScript type values from a GraphQL schema?

- A:** It saves us time since we don't have to manually compile type values for all our GraphQL requests.
- B:** It helps avoid bugs since a breaking change in the server will make our manually compiled types incorrect.
- C:** It allows us to take advantage of the fact that GraphQL is typed language.
- D:** All the above.

Answer: D - All the above.
